REQUIREMENTS:

- We require two hours prep/set-up time prior to most events and at least one hour for clean-up/break-down. The package prices include these three hours plus three hours of service. More time can be added for an additional fee of $100/hr for labor, generator diesel and propane.
- The package prices include travel up to 35 miles from our home base. Additional mileage is at $1.50 per mile round trip to cover additional fuel expense and labor travel time.
- The package also includes two staff to cook & serve in Birdie. For over 75 guests a third person is added.
- The area must have a minimum of 13' of height clearance and 1600 square feet of a hard, solid surface.
  If we don't set up the patio string lighting, less space is needed.
  This space must be accessible via a hard, solid path at least 12' wide with no danger of scratching from any landscaping, bushes or trees.
  Both the parking surface and pathway must remain so during wet conditions. Towing or removing Birdie from a stuck situation will incur a $1500.00 charge.
- A pre-event site visit is required to determine if the area is suitable and accessible.
- Birdie runs on an 11,000-watt enclosed, very quiet generator . You can barely hear the generator and if there is music playing you won't hear it at all.
- If you prefer we not run on generator power then a 50 amp power outlet will need to be available within 25' of the trolley and will need to match our power cord.
- Installing this power source will be the venue or client's responsibility and expense.
- For safety and liability reasons, no one other than our staff will be allowed on the trolley.
- Absolutely no one other than our staff will be allowed to move or drive the trolley.
